Floating Market, Damnoen Saduak, Thailand

Every week people go to the
supermarket to buy
vegetables....

like green beans and cucumbers...

...that
come
from
big
farms.

Some supermarkets also sell fruit and vegetables from **small local farms**.

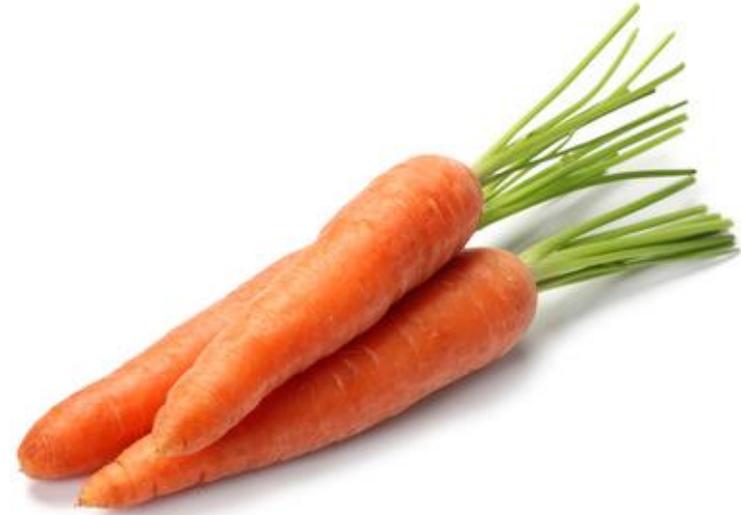

But most people think food from the **garden** is fresher and tastes better than food from the supermarket.

Some lucky people have space **to grow food**
in their own gardens.

For example, they
grow **carrots,**
onions, and
cabbages.

Many other people do not have space at home, but sometimes they work together to grow food in a **community garden**.

It's easier than you think to grow vegetables. First you **dig**.

Then
you
plant
the
seeds.

But remember to **water** the plants!

And you have to
weed the
garden
sometimes.

When the
vegetables
are **ripe**,

they are **ready**
to **pick**.

Guess the vegetable!
