문장 = sentence

문단 = paragraph

Tornadoes happen all over the world. There's even a place called Tornado Alley. Josh Wurman studies extreme weather. He joined a team of other scientists to study tornadoes in Tornado Alley. One day, the blue sky turned black. A giant cloud came toward the team. The cloud had winds that moved in a circle. Inside his truck, Wurman watched the storm through his window and on his instruments. Colors on the computer screen showed where the rain fell and where the wind was the strongest.

The winds twisted the storm tighter and tighter into the shape of a funnel. When the funnel touched the ground, it became a tornado! The tornado looked like a giant, gray elephant's trunk. It moved one way, then another way. As the tornado moved across the ground, the team came dangerously close. They dropped special instruments close to the storm. These instruments showed wind speed, temperature, and how much rain was falling.

Tornado Trouble

¹Tornadoes happen all over the world.² There's even a place called Tornado Alley.³ Josh Wurman studies extreme weather.⁴ He joined a team of other scientists to study tornadoes in Tornado Alley.⁵ One day, the blue sky turned black.⁶ A giant cloud came toward the team.⁷ The cloud had winds that moved in a circle.⁸ Inside his truck, Wurman watched the storm through his window and on his instruments.⁹ Colors on the computer screen showed where the rain fell and where the wind was the strongest.

¹⁰The winds twisted the storm tighter  and tighter  into the shape  of a funnel.  When the funnel touched the ground, it became a tornado! ¹²The tornado looked  like a giant, gray elephant's trunk. ¹³It moved one way,  then another way. ¹⁴ As the tornado moved across the ground, the team came dangerously close. ¹⁵They dropped special instruments close to the storm. ¹⁶These instruments showed wind speed , temperature,  and how much rain was falling.

¹⁷The tornado twisted ¹⁸and moved ¹⁹for half an hour. The team watched the storm ²⁰and their instruments the whole time. ²¹[Then] the tornado leaned ²²over slowly ²³like a soft rope. Poof! It was gone. The excitement was ²⁴over. But Wurman ²⁵and his team have a lot more work to do. The information ²⁶from their instruments will help them predict other tornadoes ²⁷so that they can warn people ²⁸and save lives.

[weird but true] It once rained frogs on a town in Serbia. A small tornado dropped them there.
